EDUCATION

Emporia State University, Emporia, KS

March 2024 - December 2024

Master of Business Administration, Focus on Information Systems

Creighton University, Omaha, NE

August 2019 - May 2023

Bachelor of Science in Exercise Science, Minor: Biology

WORK EXPERIENCE

Senior Business Application Analyst, Jorban-Riscoe Associates

August 2025 – Present

- Architected an LLM-powered procurement automation system that reduced manual vendor processing by 85% across \$31M+ in annual purchasing volume.
- Built a vendor invoice ingestion agent using email parsing, OCR, structured LLM outputs, and NetSuite RESTlets to automatically create and route vendor bills.
- Developed end-to-end ERP automations using SuiteFlow and SuiteScript to streamline order-to-cash across Sales, Procurement, and AR/AP.
- Integrated MCP (Model Context Protocol) with Claude AI to enable natural-language ERP queries, allowing users to ask business questions and trigger system-safe tool executions.

Full Stack Developer, Hidalgo Technologies

October 2025 – Present

- Co-developing an AI-driven prior authorization automation platform for oncology clinics.
- Built Next.js + Azure API platform architecture with server-side rendering (SSR/PPR) and secure multi-tenant routing via Entra ID.
- Leveraging Azure AI Foundry to generate structured reasoning traces for auditable insurance submission packets.

Founder, Suite Portal

September 2025 – Present

- Built a multi-tenant entity portal that extends Oracle NetSuite into customer, vendor, and employee-facing portals without requiring additional ERP licenses.
- Implemented rapid onboarding that syncs organizations, users, and entity records from NetSuite into a Postgres-backed identity and permissions layer.
- Developing modular MCP based AI agents for record lookup.

Applications Developer, KC Store Fixtures

March 2024 – August 2025

- Automated core order-to-cash workflows in NetSuite, reducing manual transaction handling and cycle times across Sales, Operations, and Accounting.
- Built address validation and real-time shipping rate agents integrated with shipping carriers, improving fulfillment accuracy and reducing freight loss risk.
- Developed multi-warehouse MRP forecasting dashboards directing \$100K+ in biweekly purchasing decisions across domestic + overseas supply chains.
- Designed and launched a Next.js B2B distributor portal providing live pricing, inventory, and order history. 30+ customers onboarded in first two quarters post-launch.

- Reduced ERP complexity by 28% during my tenure through targeted architecture simplification, saving \$120K+ annually in licensing and consulting overhead.
- Implemented automated tariff, landed cost, and surcharge calculations, improving pricing accuracy at scale.
- Built pallet-level shipment orchestration, enabling real-time logistics visibility for enterprise retail partners.
- Led system-wide integration initiatives connecting NetSuite with WMS, e-commerce, BI, and vendor systems.
- Launched a company-wide automation program eliminating 1,500+ labor hours annually through low-code workflows + SuiteScript tooling.
- Developed warehouse labor and throughput dashboards to forecast staffing and resource demand.
- Automated product content generation (SEO copy + 3D visuals) for e-commerce listings using AI-assisted workflows.
- Managed vendor consultants and dev partnerships to ensure delivery quality, maintainability, and internal knowledge transfer.

Certified Nurse Assistant (CNA), St. Josephs Elder Services January 2024 – March 2024

- 8-week travel assignment

Founder, Blackout Bluejay August 2022 – January 2025

- Founded and scaled a collegiately licensed clothing brand to generate 5-figure annual revenue, securing investor capital to support company growth and operational objectives.

Personal Trainer (CPT), Black Clover Fitness August 2023 – January 2024

- Memberships increased 18% during my tenure.
